

Mahima Bhutani

UX DESIGNER

Since my early days, I had utmost fascination for different human perception and decision-making process. It was only later that I realised, I want to influence and gratify these humanly experiences. Since then, I have devoted myself to User Experience Research and Design.

I have delivered multiple projects both as a member of a skilled team as well as independently. The projects were in different fields and settings providing an all-round development. I have learnt to be persistent and solve problems in creative ways, while still playing well with others.
